(1)Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(2)Annual wages have been calculated by multiplying the hourly mean wage by 2,080 hours.

(3)The relative standard error (RSE) is a measure of the reliability of a survey statistic. The smaller the relative standard error, the more precise the estimate.

SOC code: Standard Occupational Classification code -- see <http://www.bls.gov/soc/home.htm>
